## PROFILE

An experienced front-end developer with extensive experience in creating high-quality web applications and user interfaces. I have deep knowledge of HTML, CSS, JavaScript and modern frameworks such as React. I am able to work in an Agile environment and effectively interact with cross-functional teams to achieve my goals. I have proven experience in optimizing application performance and ensuring their cross-browser compatibility. I am enthusiastic about solving complex problems and constantly strive for professional growth.

## WORK EXPERIENCE

### Really Great Company

*Americann Dream*

- Leadership of a team of 5 front-end developers, task allocation and quality control of completed work.
- Development and implementation of new functionality for a highly loaded web application using React and Redux.
- Optimize performance and ensure cross-browser compatibility of web applications.
- Interact with design and backend teams to create consistent and effective solutions.
- Mentoring junior developers and conducting code reviews.
